

DALLAS DEE

Good-Time House Music

Biography

Dallas Dee is a Toronto, Canada-based producer and DJ who delivers the sounds of feel-good house music. Think of sunshine, happy melodies, and dancefloor focussed grooves all blended together.

She has played at clubs and festivals across Canada, including Classics (Nova Scotia); Future Forest (New Brunswick); WEMF, Om, Stacks on the Beach + more (Ontario), and Emotion (Saskatchewan). One of her original songs, "Not Gonna Happen" even went viral on TikTok in summer 2026..

With her proven ability to read the dance floor and deliver the right music to create a vibe, you can expect to hear anything from melodic to disco, funky, tech, or jackin' house in a Dallas Dee set; whatever the moment needs.

Her musical journey began playing vinyl in the 1990s Toronto rave scene and jungle/dnb music. After becoming a mother, Dallas faced a difficult personal struggle with postpartum depression and thought she was done with music. But the soul-soothing melodies of house music reawakened her passion for producing music and DJing, and Dallas Dee was called back to the DJ booth to share positive, uplifting music with others.

Her music has appeared on Canadian and international labels, including Cuete, Ear Candy, FGA, Kattivo, M5, Midwest Hustle Music, Neurotics, and Purveyor Underground. Featuring a blend of funky, melodic, and deep elements, her songs have been categorized as house, deep house, minimal house, tech house, deep tech, melodic techno, nu-disco and progressive house.

She is the host of Dee's DJ Socials in Toronto, Canada, and a member of the Siren Project collective. The Siren Project is a women, trans women and non-binary Production Co. with a mission to raise funds for women empowerment.
